QUAD BASE - INSTRUCTIONS

INSTRUCTIONS

These bases will work to minus 35C

Please read and follow carefully.

- Make sure the levers are in the **OFF/UP** position
- Ensure bases and surface are clean, then press the unit on a flat area without gaps
- Make sure both bases lie flat on the surface (See Drawing below)
- Press down and operate the levers to the ON position
- To remove undo the levers and pull up on the pull tabs

TIPS

- Visible outlines after removal are usually caused by dust outline of base where no dust has landed - can be removed with soapy water
- Levers **MUST** be in the **OFF** position when not in use

Some Applications

Attaching Devices to vehicles - Signs - Lamps - Beacons etc. -

External Shop Window Signs - Banners - Menus - Sale Signs -

Add on roof rack bar - rear bar added to normal estate car bars

The metal plate should be adjusted to vehicle curvature as follows:

1

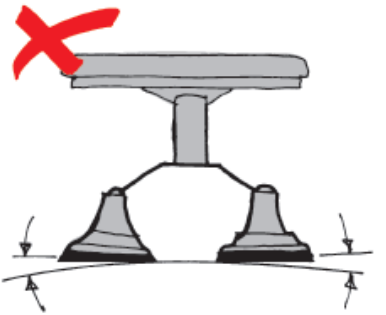

Gently bend the plate so that both bases sit flat on the surface without pressing

2

**Once the plate is set
2 remove the films
3 press on the bases
operate the levers**

3

Please read box instructions
